## IT Gården acquires Dimac Hosting and strengthens its position in the Skåne region

IT Gården, a portfolio company in Norvestor VII, L.P. ("Norvestor"), has acquired Dimac Hosting, a well-established player in the area of IT outsourcing in Helsingborg, Sweden.

*"Dimac Hosting is a very well-managed company and, through this acquisition, IT Gården will strengthen its position in Helsingborg. We complement each other in terms of both services and customers. We are very happy to have Dimac Hosting on our team."*, says Åge Lønning, CEO of IT Gården Group.

Dimac Hosting was established in 1996 and is specialized in industrial hosting with a focus towards efficient services to industries and governmental organizations. Dimac Hosting has a renowned reputation in the local market. In a customer survey completed in November 2018, Dimac Hosting's clients scored the company 9.6, on a scale to 10, on likelihood of recommending Dimac Hosting to a friend or a colleague.

*"Our services differ somewhat, which is something that I think could be a strength. When we started, we choose to focus on IT operation and security while IT-consultancy was not prioritized. Together with IT Gården, we seek to deliver a full service offering to our current customers"*, says Lefti Papadopoulos, CEO of Dimac Hosting.
